

## *The fast way to mobilize your workforce*

Designed for IT departments, VIZU™ Toolbox is precisely geared for IT departments managing internal systems, deploying complex solutions, providing end-user support and looking to let mobile personnel interact with these same systems in a secure, robust and easy to support environment.

VIZU™ Toolbox lets your IT team concentrate on what they do best and leverage our expertise to provide a complete development platform to dispatch jobs, tasks, reports and approval request.

The data exchange architecture of VIZU™ Toolbox let them retrieve the information needed to let your business flourish in a paperless mobile world.

All that without having to write a single line of code on a PDA.

#### With VIZU™ Toolbox:

- Integrate with your existing systems with easy to implement bidirectional XML file transfer – you read and write XML files and we take care of the rest!
- Empower your existing systems to dispatch jobs, tasks or reports to be completed by your mobile workforce on PDAs
- Configure the alert level to be used on the PDA upon reception of a new task
- Give your mobile users the ability to fill custom form or report as needed
- Have visibility of what your users are doing and when with our integrated timestamp module
- Perform initial integration with our software engineers guiding you every step of the way
- Configure and manage the entire solution using a simple web based console
  - Configure new mobile users
  - Install VIZU™ Toolbox mobile software on your PDAs
  - Manage your mobile templates using our user friendly interface
  - Consult system status and access diagnostic tools

#### Typical usage:

- Collect mobile data and eliminate paper based forms
- Extend your internal dispatch application to delivery crew
- Extend your internal work order management solution to mobile technicians
- Extend your internal invoicing solution to your mobile personnel
- Extend your internal approval management solution to your mobile executives
- Add mobility to your own software product

#### Features:
